

## Yandex Email Setup for Outlook

- 1) Click the Manual setup or additional server types check box, and then click Next.
- 2) Click **IMAP**, and then click **Next**.
- 3) Under **User Information**, configure the following settings:
  - In **Your Name** box, type your full name,
  - In the **Email Address** box, type your full email address.
- 4) In the **IMAP** field, configure the following settings:

In the **Incoming mail server** box, type the name of the server in lowercase letters:

Mail server address: **imap.yandex.com**  
Connection Security: **SSL**  
Port: **993**

In the **Outgoing mail server** (SMTP) box, type the name of the outgoing email server in lowercase letters:

Mail server address: **smtp.yandex.com**  
Connection Security: **SSL**  
Port: **465**

Select the **Outgoing Server Tab**, check **My outgoing server requires authentication**.

Check the box > SMTP server requires authentication > log In with and enter your details.

5) Under Logon Information, configure the following settings:

User Name: **Your full email address is your username**

Password: **Your password**

If you want Outlook to remember your email account password, select **Remember Password** check box.

6) Press the **Check Settings** button.

7) Click **Next**, and then click **Finish**.
